"Were it possible for every voter of the Republic to see for himself the condition and recompense of labor in Europe, the party of free-trade in the United States would not receive the support of one wage-worker between the two oceans."—JAMES G. BLAINE.

"FREE TRADE"

At a Cleveland ratification meeting in New York on Monday night William Lloyd Garrison said:

"We have no desire to conceal that our attitude is one of absolute free trade."

At the same meeting Henry George said: "I stand here to ratify the nomination of Cleveland and Thurman. I am a free trader, and a man who is now afraid to be branded as a free trader does not know the power in the word free. The protectionists have had their way for years, and it is about time we tried for freedom."

And still the Alta, Examiner and other Democratic papers deny that the Democrats are for free trade. If the Protectionists have had their way, we have had a prosperous country on account of protection.

The Alta says that Curtis, the American candidate for President, is 76 years old, and that it don't want a man who will be 81 years old at the end of his term. That's what's the matter with Thurman. The American people don't want a man for Vice President, and who might become President, who will be 80 years old when his term expires. So Thurman had better withdraw, and save being beaten.

Hundreds of Californians wear Dunlap's hats, made in Cincinnati. Dunlap employs 700 men and four years ago worked hard for Cleveland, and carried most of his employees with him, but this year he is for Harrison, and says he does not think Cleveland will get a vote out of his establishment. This is what he told a reporter of the Democratic Cincinnati Enquirer.

From the number of old hacks in the Republican party seems to have consumption.—Alta.

It is troubled that way this year. Its consumption of the rank and file of the Democratic party is so great the leaders are alarmed, and they may well be.

Carroll Cook, Goldenson's attorney, keeps dinging at Gov. Waterman in regard to his insane affidavits. Will he never let up, and give the Governor and the people a rest before the young scoundrel is hanged?

From reading the Alameda items in the San Francisco papers one would be almost led to believe that the married people of Alameda county were all after a divorce. The Courts of that county are full of such suits.

The Democracy must be hard up for speakers when they engage Dennis Kearney to stump the State for the Cleveland and Thurman ticket.

The crop of sugar beets in Santa Cruz county is large, and next week Spreckels' new sugar plant at Watsonville will crush them for sugar.

The Grand Army special train will leave San Francisco to-morrow evening at 7 p. m. for Columbus, Ohio, where the G. A. R. reunion is to be held.

Warner Miller has been nominated by the New York Republicans for Governor. The convention was very harmonious.

Coal has been advanced in San Francisco to \$20 a ton. This is rough on poor folks.

The immigrant rate from New York to San Francisco is \$38.25.

Wheat being short, London bakers have put up the price of bread.

ALPINE REPUBLICANS.

In another column will be found resolutions passed by the Republican Central Committee of Alpine county. Alpine has but a handful of voters, scarcely as many as are polled in Bridgeport, and not half as many as in many of our other counties, and in Inyo, and, on account of its small vote, the Republicans and Democrats of the larger counties of Inyo and Mono have never supposed that their brethren of Alpine would ask for an Assemblyman, where these two counties have so much greater interests at stake. If the Republicans of that county desired the Assemblyman this year, why have they not let it be known before the larger counties had arranged the matter, and before our candidates had entered the field and made a campaign under the Crawford Plan? On Saturday next we have our nominating election, and it is now too late to make any change, even if the Republicans of Inyo and Mono would consent to it. The Alpiners should have consulted the Republicans of this county and Inyo early in the season, and not attempt to force a nomination on the party, whether Inyo and Mono would like it, or not. Inyo county has increased her Republican majority alone more than the entire vote of Alpine will be next November, and we doubt if they would give assent to any different arrangement than prevails at this time, as Inyo would have claimed the nomination if Mono had resigned it. The Alpiners should stand by the Mono nomination this year, and two years hence they have the privilege of making such arrangements as they can with Inyo and Mono, but they must admit, they have gone the wrong way to work this year. And, again, how are the Republicans of Inyo and Mono to know that Mr. Coleman is the choice of the Republicans of Alpine? It is taking considerable on themselves for a few members of a Central Committee to nominate an Assemblyman or county officer. It generally raises a row where such Committees appoint delegates to a Convention. The Republicans of Inyo and Mono would not allow a Central Committee to nominate candidates for any important office. We hope our Alpine friends will reconsider and stand in and elect the one the Republicans of Mono nominate on Saturday next. As Lincoln would say, it is too late now to "swop horses." Reconsider, gentlemen.

The Union Pacific train due at San Francisco yesterday morning was wrecked on Wednesday at Kimball, Neb., by the rails spreading, the locomotive and every car but one being thrown from the track. The one saved was a private car occupied by Claus Spreckles and wife. No one was hurt. The train will arrive at San Francisco to-day.

CANT AND SLANG.

An Englishman's Observations on These Abuses of Language.

"Cant" was the Gaelic or British word, signifying language—the language, par excellence, of the common people in the olden time before the prevalence of the Teutonic or Anglo-Saxon. From that language the now common slang of the streets, and of the very low classes of the population, inherited its origin. It is a language, however, that is not so much a language as a habit, and even by those of a still higher grade, is in great part derived.

If proof be needed of the fact, it will be only necessary to cite such words and phrases as "cove," "bloke," "beak," "hook it," "do you twig?" "masher," "brick," "cut your stick," and scores of others that are but too familiar among the millions both of low and high life.

"Cove," a fellow, a man, a person, is from the Celtic or Gaelic cobb—b pronounced as v—which signifies courteous, and is synonymous with the vulgar abbreviation of "gent" for gentleman.

"Bloke," a term of disrespect and not of courtesy, is from bloc, a large or big-headed person, and blocch, a big, strong, coarse person.

"Hook it," to be off, to run away, to decamp, is from thugad—th silent—a command to be off to go away.

"Beak," a magistrate, is from beack, judgment or a judge.

"Do you twig?" do you understand? is from tuig, to understand, and tuigain, comprehension.

"Masher," a beau, a dandy, a swell, an exquisite, is probably, though not certainly, from mear, pronounced mash, certain.

"Brick," the highest eulogium paid to a good fellow, is from brig, spirit, energy, courage and right feeling, and bright, high-spirited and manly.

"Cut your stick," to disappear, to run away, to decamp, is a ludicrous corruption of cut as teach, or "leave the house."

The secret tricks and observations of trades and professions of all kinds which are spoken of themselves by their adepts and practitioners are to a great extent derived from the same ancient sources, although, as these tricks and mysteries were less widely practiced and known in the comparatively primitive times of the Middle Ages than they have become in the modern era, a rapid change of slang and cant words is to be expected.

The trades and professions of the present day, while preserving many of the old Celtic shibboleths and passwords, have invented or compounded new ones from the Teutonic and Latinized English as it has been extended within the last two centuries. As new and more ingenious methods have been practiced by unscrupulous traders, they have discovered or coined new words and phrases to designate their knaveries.

In the days when milk was sold pure and undiluted as it came from the cow, there was no necessity to talk of the cow with the iron tail, or the pump, or of a fabulous "sinus" or "sinus" whose aid was required to convert milk into milk and water; or for beer, when similarly treated, to be described as "stretched."—Charles Mackay in Blackwood's Magazine.

STUPID PHILANTHROPY.

An Illustration of Misdirected Energy and Liberality.

A vivacious lady was relating to a friend how much difficulty she and a few others had had in raising a sum of money sufficient to send a missionary to Constantinople.

"We did have to work so hard," she said pathetically. "People absolutely refused to be interested. We held fairs and made people buy things; and we had parlor concerts and actually forced our friends to take tickets; and we sewed and we begged subscriptions."

"But now we've got the money it is worth all our trouble to see the zeal of the young lady we are going to send out. Of course she won't introduce religion at first, until she has won their respect; but she's bought a Turkish grammar, and she's so eager to begin to civilize the Turks, and she has such clever ideas about how to go to work, too."

"But how will she go to work?" the friend inquired. "What will she teach them first?"

"Oh, all sorts of nice things," the other returned rapturously. "Things that tend to elevate. She'll teach them to—to why, to eat with knives and forks and not to have harem and to sit on chairs."

BURNT CORK.

The Talmy Days of Minstrelsy.

I was reading that the wife of Jack Haverly, the once well-known negro minstrel manager, induced him to give her every night out of the receipts of the show, so that when he went into bankruptcy she possessed a fortune of about \$50,000. He begged her to lend him the money, but she refused him, and to-day they are living comfortably on her savings.

An hour or two afterward I met Bill Foot, who was a boomer for Haverly when that sky-rocket of a manager was high in the air. Foot now runs a boarding-house in this city, and is the thespian of the Dockside Theatre during the absence of the Dockside's Minstrels on a tour.

"Oh, yes, those were 'halcyon days,'" said he. "There was a time when the manager of a minstrel company had to do hardly anything else than open the doors of a hall and let the people pay to come in. The five or six years after the war were especially profitable. New towns of three to five thousand inhabitants, were constantly being discovered by wide-awake agents, and places of that sort were dead sure to yield fine audiences for anything in the way of minstrelsy."

"But it isn't so now. The meat is all gone out of that cocoon, and the man who can make a negro minstrel company pay has got to hustle for it."—New York Letter to Indianapolis News.

The Straightest Man.

Teacher—"Who was the most upright man in the Bible?"

Smart boy—"I know who was the straightest."

Teacher—"Well, who was the straightest?"

Smart boy—"Joseph."

Teacher—"Why?"

Smart boy—"Because Pharaoh made a ruler of him."
